

William F. Penwell, PhD. is currently an associate professor of biology at Jacksonville University. He authored the “Bacteria (Fecal coliform, E. coli, and Enterococci)” section of the *State of the St. Johns River Report*. Dr. Penwell’s research interests focus on three major areas: 1) virulence factors used by the human pathogen, *Acinetobacter baumannii*, 2) antibiotic discovery from environmental bacteria, and 3) bacteria iron acquisition. Dr. Penwell is a member of the American Society of Microbiology. He has supervised 15 undergraduate students at Jacksonville University.
